DATE MAILED: 12/13/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

	Application No.	Applicant(s)			
055	10/000,325	CHU, MICHAEL S.H.			
Office Action Summary	Examiner	Art Unit			
	Michael Thaler	3731			
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).					
Status					
1) Responsive to communication(s) filed on 13	October 2005.	-			
2a)⊠ This action is <b>FINAL</b> . 2b)□ TI	This action is <b>FINAL</b> . 2b) This action is non-final.				
,—	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is				
closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.					
Disposition of Claims					
4) ☐ Claim(s) 1-39,61-107,109,112,115 and 118  4a) Of the above claim(s) is/are withd  5) ☐ Claim(s) is/are allowed.  6) ☐ Claim(s) 1-39,61-107,109,112,115 and 118  7) ☐ Claim(s) is/are objected to.  8) ☐ Claim(s) are subject to restriction and	rawn from consideration.				
Application Papers					
9) The specification is objected to by the Examiner.					
10) ☐ The drawing(s) filed on is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.					
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).					
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).  11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.					
Priority under 35 U.S.C. § 119					
<ul> <li>12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).</li> <li>a) All b) Some * c) None of:</li> <li>1. Certified copies of the priority documents have been received.</li> <li>2. Certified copies of the priority documents have been received in Application No</li> <li>3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).</li> <li>* See the attached detailed Office action for a list of the certified copies not received.</li> </ul>					
Attachment(s)  1) Notice of References Cited (PTO-892)  2) Notice of Draftsperson's Patent Drawing Review (PTO-948)  3) Information Disclosure Statement(s) (PTO-1449 or PTO/SB/C	· ==

Application/Control Number: 10/000,325

Art Unit: 3731

Claims 1-4, 7-10, 14-19-26, 30-34, 38, 39, 61-64, 67-70, 74-90, 94-98, 102-107, 109, 112, 115 and 118 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Yamamoto et al. (6,059,719). Yamamoto et al., in figure 13, for example, disclose elongate member (the combination of (A) the central wire between members 132-134 and member 8 and (B) wire 22 which are secured together at 8a and 24 to form a single member) for insertion into a channel 20 of the endoscope 2, distal assembly 6B having an open configuration and a closed configuration with a profile larger than a diameter of the channel 20 of the endoscope 2 wherein the distal assembly includes a tube 8b, 8c and an end effector 9b (col. 13, lines 33-35). Alternatively, it would have been obvious that the combination of the wires cited above form a single member since they are secured together at 8a and 24 to form a single entity. As to claim 3, Yamamoto et al. disclose a stop at 17b. As to claim 7, Yamamoto et al. disclose attachment cup 70. As to claim 8, the activation shaft is inherently capable of rotating the distal assembly when the activation shaft is rotated. As to claim 9, the distal end of the activation shaft is bent when it is in a curved path in the body. As to claim 10, the distal assembly is inherently capable of obtaining and storing multiple small samples. As to claim Application/Control Number: 10/000,325

Art Unit: 3731

15, Yamamoto et al. disclose ring 24. As to 20, 21, 80, 81, 83, 84 and 105-107, the proximal portion of each member 132-134 is a spring since it is elastic and biased outwardly while the distal portions of members 132-134 are considered to be the claimed jaw members.

Claims 5, 6, 11-13, 27-29, 35-37, 65-66, 71-73, 91-93 and 99-101 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamamoto et al. (6,059,719) in view of Townsend et al. (6,066,102). As to claims 5, 6, 27-29, 65, 66 and 91-93, Yamamoto et al. fail to disclose the details of the handle with the slide. However, it is old and well known in this art to so construct handles for reliably and smoothly activating surgical end effectors. For example, Townsend et al. discloses casing (the frame on which handle 42 slides), slide 46, cap (at the proximal end of the frame), knob 44, 42 and a groove (the groove that 44 slides in). It would have been obvious to so construct the Yamamoto et al. handle so that it too would have this advantage. As to claims 11-13, 35-37 and 71-73, Yamamoto et al. fail to disclose the details of the distal assembly and elongate However, it is old and well known in this art to so construct a 1) distal assembly and 2) an elongate member in order to obtain the advantage of 1) performing specific operations and 2) for reliably and smoothly activating surgical

Application/Control Number: 10/000,325

Art Unit: 3731

end effectors. For example, Townsend et al. discloses needle 718 and a lumen 28 to receive a medical device (col. 6, lines 44-55). It would have been obvious to so construct the Yamamoto et al. distal assembly and elongate member so that it too would have this advantage.

Applicant's arguments filed Oct. 13, 2005 have been fully considered but they are not persuasive for the reasons set forth above. Note that page 3, lines 8-9 of the Office Action mailed July 26, 2005 referred to figure 13 of Yamamoto et al.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
